

Our Company Profile

our values

excellence
competence
integrity

about us

We are an innovation centric entity operating in multiple disciplines within the technology & security space.

Our entity provides various solutions for its clients, from surveillance, access control, Networking to Telecommunications and Unified Communications [see services]

Over the years, our team of experts have been working towards refining and deepening their knowledge and skills within various areas such as technology infrastructure, security solutions, innovation and business administration, but to name a few. It is with these investments made that we believe that our high quality standards and efficiency stem.

Competing with major companies, many of which are founded and run by males, we are proud to let you know that our success has been through the initiative and drive of a young black female, who both founded and oversees all operations of the entity to date.

Nobozone is a Level 1 BBBEE company.

our vision

To be recognized for our integrity, competence and professionalism whilst understanding that being biggest is not important to us, but being the best is paramount.

what we do.
